

SCG series

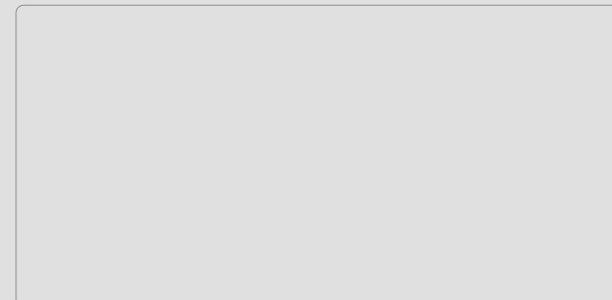

Centrifugal refrigeration compressor

17460002

FUJIAN SNOWMAN CO.,LTD.

Address: Dongjiang Road, Minjiangkou Industrial District Fujian, China.
Tel: +86 (591) 28701111
Fax: +86 (591) 28709222
Website: www.snowman.cn
E-mail: service@snowman.com
Service hotline: +86 (591) 28653300

Distributors:

Snowman reserves the right to change its products without notice in advance. The technical parameters shall be subject to order contract or technical appendix of the contract.

500 to 2000 refrigerating ton

Super-high efficiency

Environmentally friendly refrigerant R134a,
Positive pressure design and energy saving,
Large cooling capacity,
High efficiency and reliability.

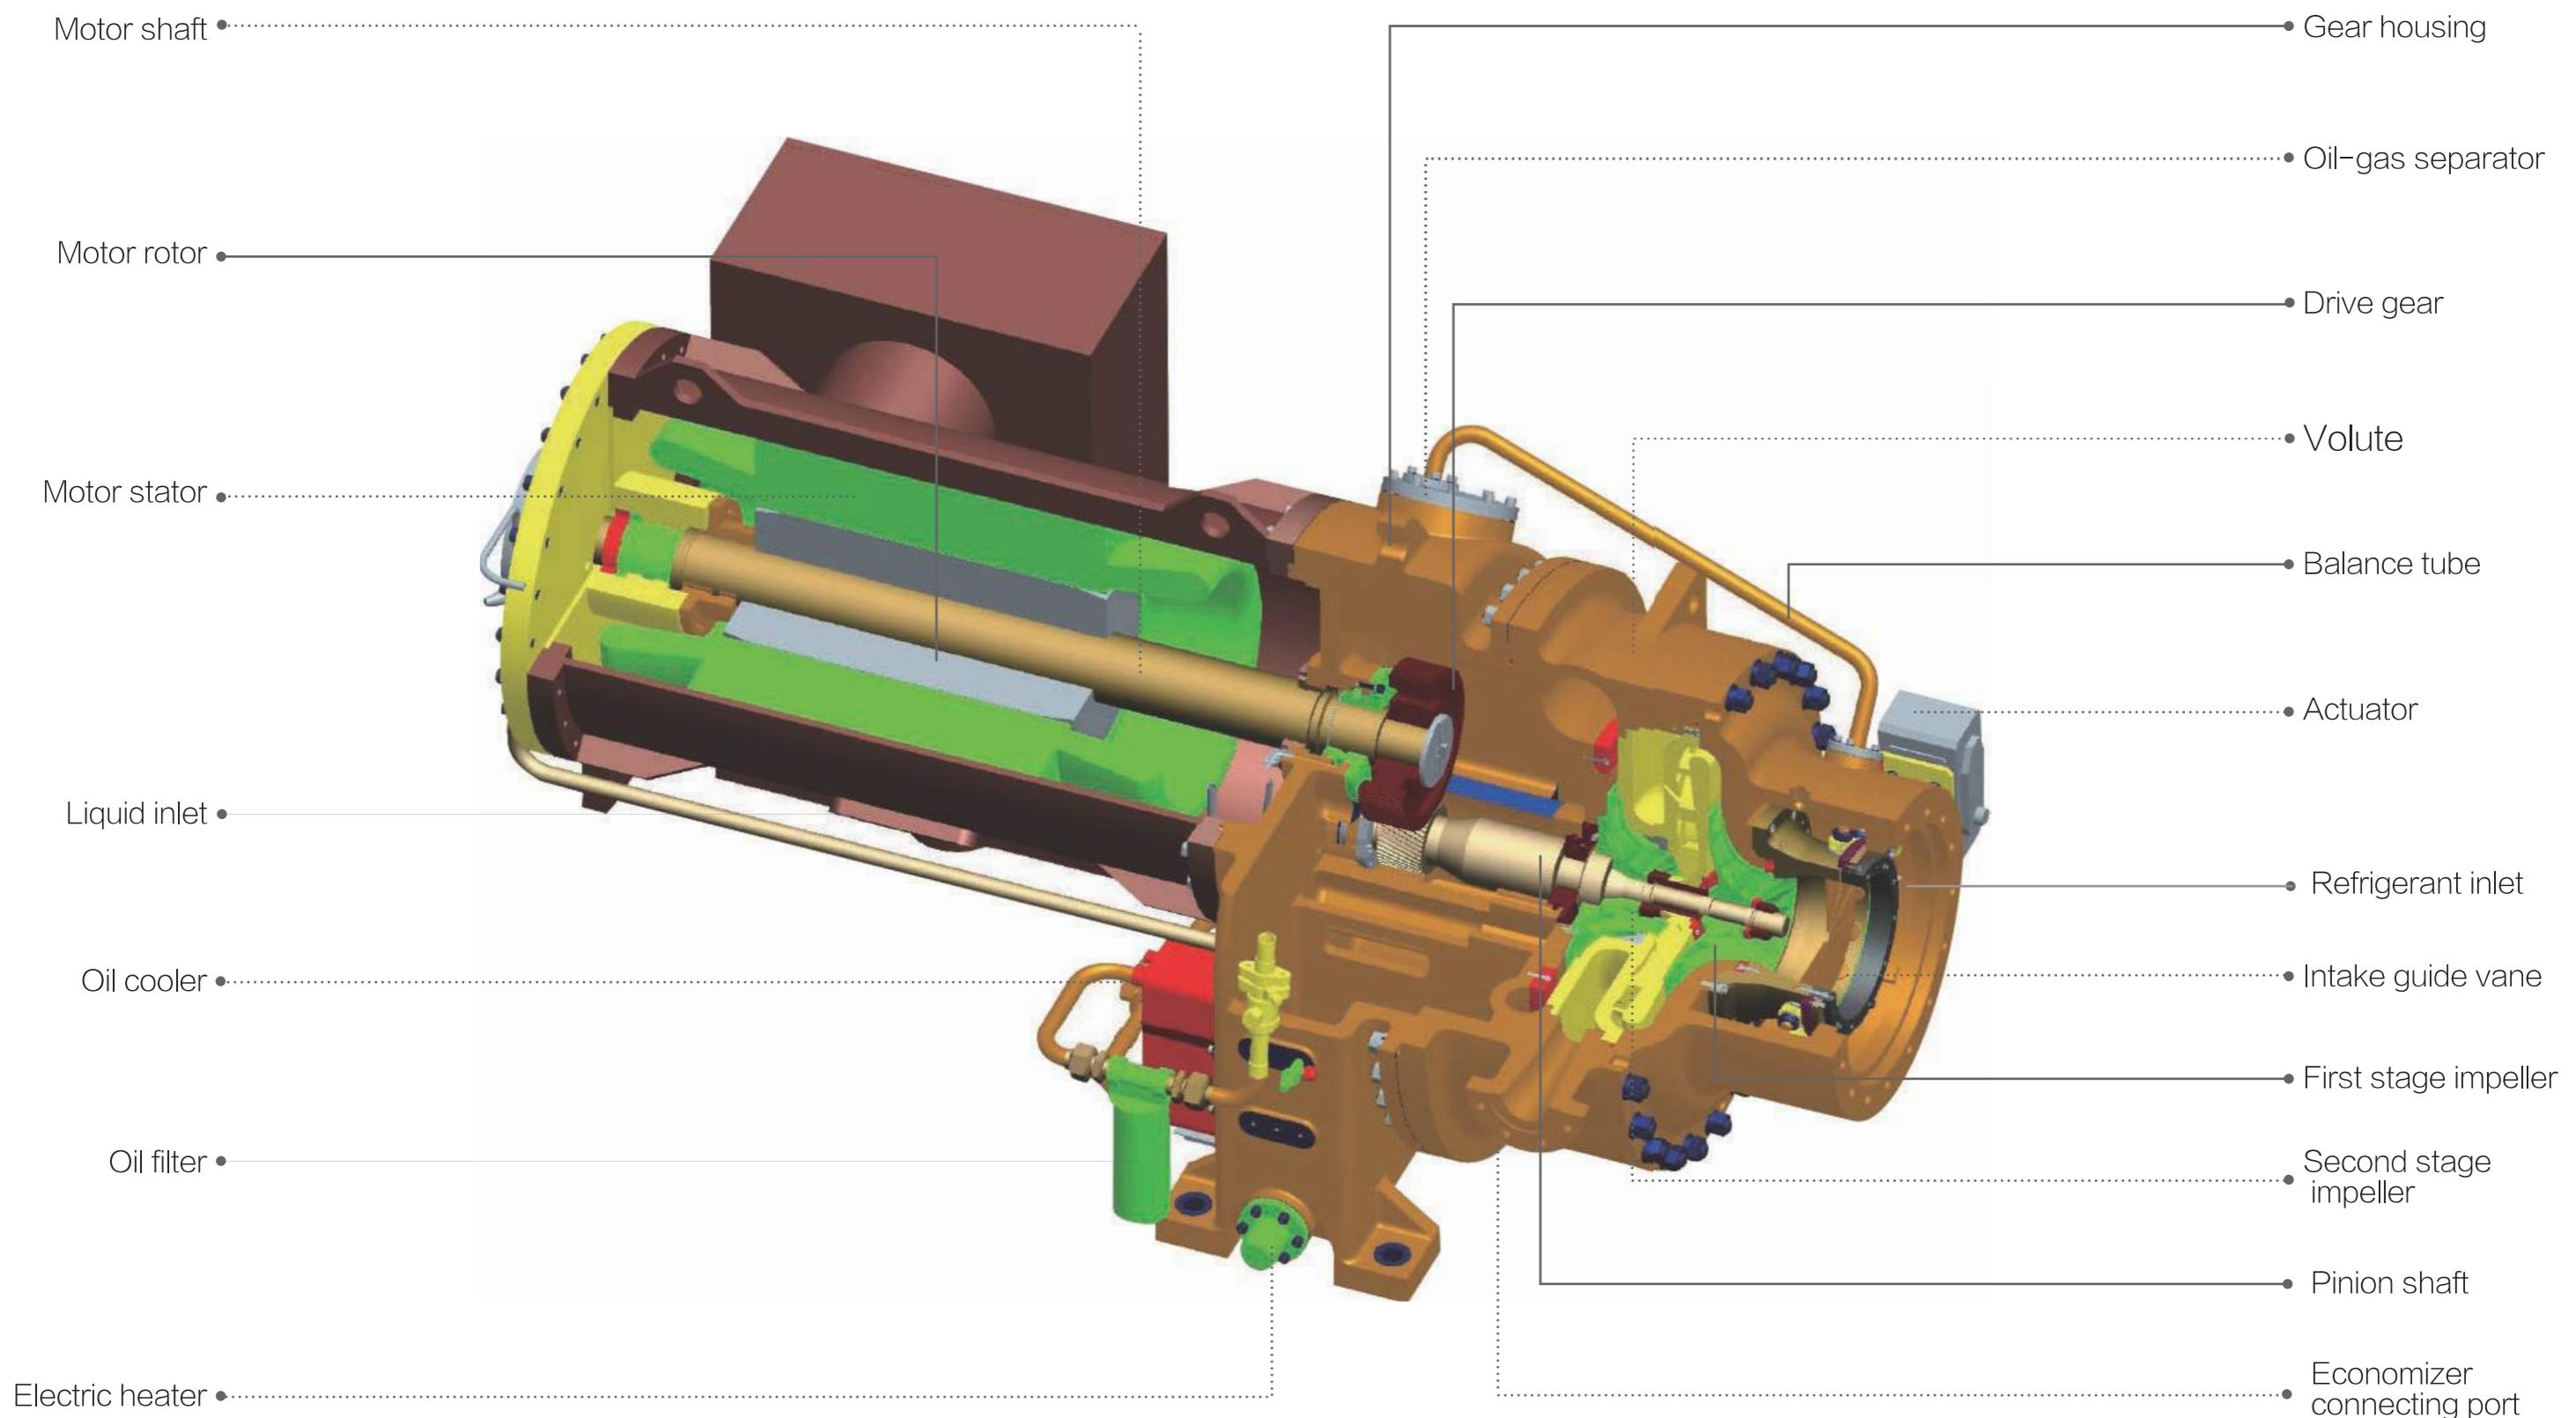

SCG-1701-02

Structure diagram

Feature

Advanced technology

- Aeroengine-class world-leading centrifugal compressor design technology.
- Unique replenishing gas augmentation technology, significantly improves the energy efficiency and reliability of the compressor.
- Keyless coupling design between the impeller and the main shaft improves the installation accuracy , which improves the efficiency of the compressor.
- A new type of three-way high-efficiency impeller contributes to higher efficiency and wider operating range.
- Advanced flow adjustment technology makes the compressor more extensive and reliable.
- Positive pressure design owes to the environmentally-friendly refrigerant of R134a, resulting in compact structure and friendly to the environment.

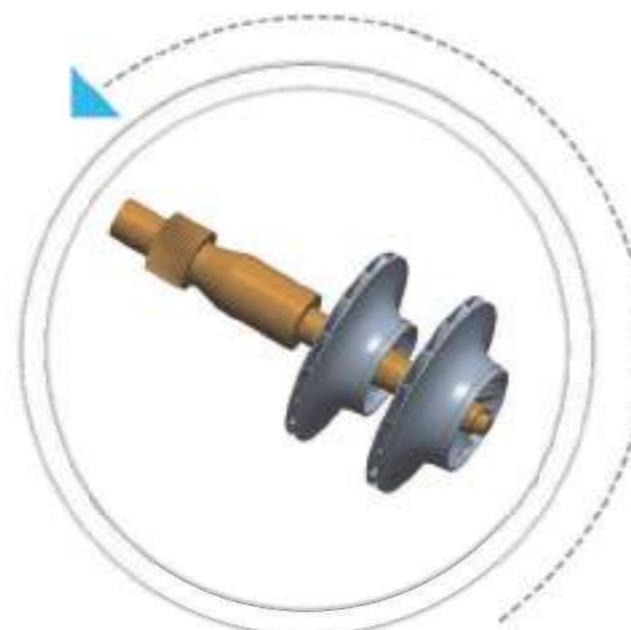

Stable and reliable

- The motor adopts double support structure ,more stable and reliable.
- By using the technologies such as IGV, leafless diffuser, high-efficiency replenishment and hot gas bypass it (optional) effectively avoids surge.
- Closed-type freon-cooled motor and multi-channel spray cooling technology ensure efficient and stable operation of the motor.
- Built-in oil pump design reduces the probability of leaking.
- The unique adjustable throttling technology makes the adjustment range of the unit wider and the operation more stable.

Energy saving

- Equipped with an efficient dual-stage impeller at standard type, which result to wider operating range and higher efficiency.
- Level 1 energy efficiency standard saves operating costs.

Low operating noise

- Optimize matching impeller and speed to achieve the lowest noise and best energy efficiency.
- CFD optimizes the design of the refrigeran flow channel, reducing the noise in the flow channel.
- Two-stage impeller design with low speed, further reduces the compressor noise.
- High-precision gear makes low noise and vibration.

Perfectly-fitted design for better performance

- Optimized matching for air conditioning to achieve the best performance.

The double-stage design , Wide application

- The double-stage impeller design can provide higher pressure head and wider operating range to meet the application requirements of different occasions.
- Applied to various systems such as large temperature difference (concentrated cold station), primary pump variable flow rate, high temperature cooling water (process occasion), water (ground) source heat pump, ice storage, heat recovery and so on.

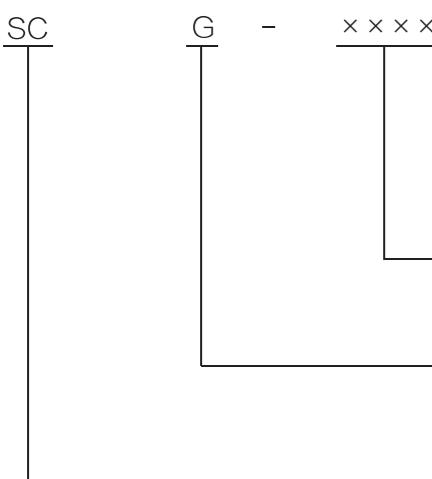

Environmentally friendly

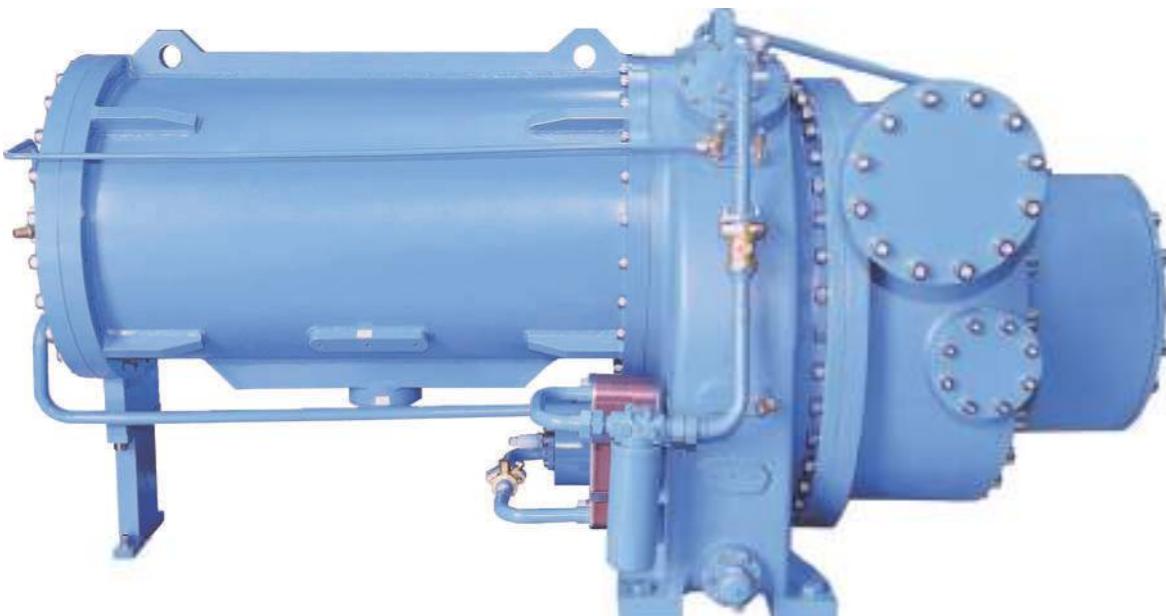

- The use of R134a environmental protection refrigerant, which does not contain chlorine, has no destructive effect on the atmospheric ozone layer.

Naming rule

Compressor model

Compressor naming rule description such as SCG-E56N. SC as the product code of the snowman company centrifugal compressor, G as the gear speed-increasing type compressor, E56N as the compressor body series and displacement for E series and the displacement of 3958m³/h.

Technical parameter

Parameter	Model	SCG-C36N	SCG-C56N	SCG-C66N	SCG-C76N	SCG-C86N	SCG-E26N	SCG-E36N	
Refrigerant	R134a								
Compressor type	Semi-hermetic double stage gear speed-ascending centrifugal compressor								
Displacement	m ³ /h	2329	2561	2794	3027	3260	3493	3726	
Inlet guiding vane Adjustment	%	0~100 (Continuous control)							
Impeller Type	/	Closed type ternary-flow efficient impeller							
Nominal speed	r/min	9550	10500	11450	7626	8213	8800	9387	
Voltage	V	380/415/460/6(kV)/6.6(kV)/10(kV) (Or according to customer demand)							
Motor frequency	Hz	50/60							
Motor insulation class	/	Class F							
Motor protection class	/	IP54							
Motor overheat protection	/	PTC/PT100/(Or according to customer demand)							
Oil heater	kW	0.33×3(Voltage at 220V)							
Length	mm	2100	2100	2100	2280	2280	2345	2345	
Width	mm	1080	1080	1080	1130	1130	1247	1247	
Height	mm	1090	1090	1090	1140	1140	1165	1165	
Weight	kg	3050	3050	3050	3400	3400	3800	3800
